Introduction to Posit Assistant and Positron IDE	Brian Varney
Getting Started with SAS Viya Workbench: SAS, Python, and R in One Analytics Environment	Jim Blum; Jonathan Duggins

[Back to top](#)

Careers, Training, & Education

Title	Speaker(s)
Network Analysis and Network Optimization	Carlos Pinheiro
The Business Value of Diversity Combined with Data Science	Stephen Sloan
Leveraging SAS to Automatically Assist with Code Reviews: An Academic Application	Rachel Winpisinger; Jonathan Duggins
So You Want to Be An Independent Consultant? - 2026 Edition	Josh Horstman
Methods and Tools for Publishing at SESUG and Beyond -- Basic Techniques	Jonathan Duggins; Jim Blum
Custom Steps in SAS: A Gateway for Learning Macro Programming	Jim Blum; Jonathan Duggins

[Back to top](#)

Data Collection, Management, & Manipulation

Title	Speaker(s)
Beyond Macro - Data-Driven Programming with CAS in SAS Viya	Mark Jordan
Working with Database Data in SAS Viya	Mark Jordan
Primary Drivers of FDA Complete Response Letters: Insights from a SAS-Based Analysis	Hannah Weber
An Integrated SAS Framework for RECIST Review of Investigator and Independent Central Review Assessments	Phillip Chen

https://www.sesug.org/SEASUG2026/papers_submitted.php

More Than a Programmer: Leveraging Statistical Acumen to Drive TLF Mock Shell Design	Venkata Damaraju
A Domain-Specific Computer Language for Market Monitoring: From Domain Logic to SAS Code	Eric Grasby
Building Better Data Science Workflows: Best Practices with Git, GitHub, Data Version Control (DVC), and MLflow for Open-Source Collaboration	Ryan Paul Lafler
The Analysts Guide to Efficient Theme Park Tourism	Desyne Martinez
FACIT-Fatigue Questionnaire Dataset Design and Endpoint Analysis in Clinical Trials	Ye Di
A Deterministic, Multi-Phase Control Framework for Automated Model Execution and Continuous Auditability in Regulated Banking	Kamala Madavarapu
Beyond IF THEN ELSE: Techniques for Conditional Execution of SAS Code	Josh Horstman
From Annotated CRFs to Define Specifications: A SAS Macro Automation Framework	Bharath Pappula
Challenges and Opportunities in Creating Modeling-Ready Drug and Device Safety Data from Public Regulatory Sources	Shelly Hunt
From One-Time Standardization to Automated ETL: A Metadata-Driven Approach in SAS	Divya Gadde
Automated inventory reorder and sales transparency system for small retailers using deep learning.	Rashad Jafarov

[Back to top](#)

Foundational Coding Skills

Title	Speaker(s)
Creating Designer Reports and Data Sets with SAS ODS Output Objects	Louise Hadden
Efficient Data Management in SAS: Using Macro Statements and DO Loops to Combine and Merge Datasets	Abbas Tavakoli
Under the Hood: The Mechanics of SQL Query Optimization Techniques	Kirk Paul Lafler
OOTB (Out of the Box) Data Visualizations with SAS: An	Louise Hadden

https://www.sesug.org/SEASUG2026/papers_submitted.php

SEASUG 2026 CONFERENCE PAPERS	
Introduction to what the ODS Graphics Statement Can Do for You	
Automating Git Workflows in SAS with Git Functions	Lleyton seymour
Understanding SAS DATA Step Compilation, Execution, and _n_ Using Examples	Kiran Venna
Creating CONSORT Diagrams in R vs. SAS: A More Efficient Approach	Sumalatha Vaddepalli; Anil Kumar Yelike
Building SAS Viya Jobs	Greg Treiman
Bridging the Gap: Converting a Protocol-Level Analysis Program into a TA Template	Xiao Xiao
Scaling SDTM Subsetting: A Simple Program-Based Reusable Template Framework for Compliant, Consistent, and Efficient Delivery	Hong Qi
Merge with Caution: How to Avoid Common Problems when Combining SAS Datasets	Josh Horstman
From SAS to R and Back Again: Getting Started with PROC R	Lleyton seymour
Back to top	

https://www.sesug.org/SEASUG2026/papers_submitted.php

SEASUG 2026 CONFERENCE PAPERS	
Hands on Workshops	
Title	Speaker(s)
Hands-On Reporting in R with the "reporter" Package	David Bosak
Coding for Cleanliness in SAS Viya - Practical Data Quality for SAS Programmers	Mark Jordan
SAS Macro Debugging Techniques for Mere Mortals	Kirk Paul Lafler
Le petit SAS package - a workshop about the "Hello World" SAS package.	Bart Jabłoński
Getting Started with R Clinical Programming	Brian Varney
SAS Visual Analytics, Part 1: Getting Started with Data, Exploration, and Core Visualizations	Jim Blum; Jonathan Duggins
SAS Visual Analytics, Part 2: Building Interactive Dashboards and Polished Reports	Jim Blum; Jonathan Duggins
Back to top	

Intermediate & Advanced Coding	
Title	Speaker(s)
Take CoMmanD of Your Log: Using CMD to Check Your SAS Program Logs	Richann Watson
A Brief Introduction to DS2	Mark Jordan
Closing the Loop: A Portable, Metadata-Driven Framework for Automating EDC Skip Logic Cleaning Across Therapeutic Areas	Chaitanya Popuri
DOSEON: Fuzzy Matching DOSE Date Intervals ON Analysis Dates Across SAS (DATA Step, PROC SQL, SAS Macro, and PROC FCMP)	Inka Leprince; Troy Martin Hughes
Fantasy in 3 with PROC FCMP: Memoization of Resource-Intensive Calculations, in-Memory Hash Object Storage and Retrieval Operations, and Disk-Based Persistent Data Set Modification and Preservation	Troy Hughes
Efficiency Techniques in SAS 9.4	Stephen Sloan
Understanding PROC SQL Execution Order and Its Impact on Query Results	Kiran Venna
Enhancing Your SAS Viya Workflows with Python: Integrating Python's Open-Source Libraries with SAS using PROC PYTHON	Ryan Paul Lafler; Miguel Angel Bravo
NOBS for Noobs	David Horvath
UNIX X Command Tips and Tricks	David Horvath
Zero-Friction R for GxP: A Centralized Infrastructure Bridging SAS and R in Clinical Programming	Jaime Yan;
Emulating libname ZIP engine for SAS	Bart Jabłoński
Informal Introduction to Hash Tables, or How to Get Along with Associative Arrays.	Bart Jabłoński
Instrumenting a Hardened SLC Deployment on AWS, and What the Measurements Overturned	Randy Betancourt
Using SAS Macro Variable Lists to Create Dynamic Data-Driven Programs	Josh Horstman
Template-Driven Automation of aCRF Bookmarks and Table of Contents: A Low-Cost Alternative to Commercial Tools	Amar Nath; Thanga Raj
Automating aCRF PDF Page Number Population in SDTM Specifications Using SAS	Zemin Zeng

https://www.sesug.org/SEASUG2026/papers_submitted.php

Methods and Tools for Publishing at SESUG and Beyond-Advanced Techniques	Jonathan Duggins; Jim Blum
RegEx Reloaded: Advanced Pattern Matching Strategies for SAS Data Quality and Automation	Pratap Kunwar
Writing SAS Code That Writes SAS Code: Dynamic Programming with the SAS Macro Language	Pratap Kunwar
The SAS Hash Object Beyond The Docs as Experimental Science	Paul Dorfman
One-Click Study Navigation: Building a Clinical Programming Portal Using Base SAS	Pratap Kunwar
Creating Wide Complex Output Tables While Keeping One's Sanity	Nat Wooding
Back to top	

Statistics, Modeling, & Analysis

Title	Speaker(s)
NBA Betting: Are the Best Performing NBA Teams Actually Bad Bets?	Gaspar Tsai; Keira Yurashek
Network Analysis and ensemble of Autotuned Machine Learning Models to Predict Virus Spread over Time	Carlos Pinheiro
Network Analysis and Machine Learning Algorithms to Boost Fraud Detection in Credit Card Transactions	Carlos Pinheiro
Uncovering Market Inefficiencies in New York City Apartment Pricing: A Geospatial and Demographic Modeling Approach	Hadley Dowers; Nick Rejda
Forecasting Housing Supply Volatility: A Multivariate SARIMAX Approach Evaluating Economic Shocks.	Matilda Kumi; Dr. Mostafa Zahed
From Confusion to Clarity: A Programmer's Journey to Deriving Post-Treatment Adverse Events in Modern Oncology Trials	Avi Tomar
Building an In-House Macro Library for C-QTc Analysis	Huei-Ling Chen
Which Events Matter Most? A Longitudinal Correlation Analysis of Elite Decathlon Performance (1984–2025)	Abdelmonaem Jornaz
PROC PPF: Past, Present, and Future	Danny Modlin
Taking Back Control with the Interactive Modeling Node in SAS Visual Forecasting	Danny Modlin

https://www.sesug.org/SEASUG2026/papers_submitted.php

7/9

Bayesian Scoring Using PROCs MCMC and IML	Danny Modlin
Easily Turn Your Automated Explanation into a Predictive Model	Danny Modlin
The GENMOD Toolkit: What do you do when things aren't Normal?	Danny Modlin
Applying Propensity Score Matching to Evaluate Interventions	Faruk Muritala
Box Office Success Predictor Tool	Benjamin Hennel; Kagden Swords
Back to top	

Visualization & Reporting

Title	Speaker(s)
A Map to Success with Data Visualization Using ODS Statistical Graphics	Richann Watson; Louise Hadden
The Battle of the Titans (Part II): PROC REPORT versus PROC TABULATE	Kirk Paul Lafler; Joshua Horstman
Ten Practical Rules for Creating Effective Charts, Figures, and Visuals Using SAS	Kirk Paul Lafler
Putting Data on the Map: Geospatial Storytelling with SAS Visual Analytics	Greg Treiman
From Word Clouds to Phrase Clouds to Amaze Clouds: A Data-Driven Python Programming Solution to Building Configurable Taxonomies That Standardize, Categorize, and Visualize Phrase Frequency	Troy Hughes
Wizardry 101: Using a little GTL charm on your SAS graphs	Dane Korver
Binary Isn't Enough: Making Sense of Co-Occurring COVID-19 Severity Outcomes Using Interpretable Multi-Label and Multi-Class Learning	Debarshi Datta; Subhosit Ray
Streamlining Course Evaluation Reporting for Faculty Review Using PROC REPORT, ODS, and File Manipulation	Karma Brainard; Abbas Tavakoli
Viewing and Editing SAS Data in SAS Visual Analytics and SAS Data and AI Studio	Scott Leslie
X Marks the Spot: Mapping Spatial Data with SAS Code	Greg Treiman
One Code, Two Modes: A Convention-Driven R Reporting System for Submission-Ready Clinical TLFs	Jaime Yan; George Wirt; Jessica Yan

https://www.sesug.org/SEASUG2026/papers_submitted.php

8/9

SEASUG 2026 CONFERENCE PAPERS	
Paper Submission Ready Clinical Trials	Presented by
Enhancing Clinical Trial Efficiency Through Statistical Programming Support	Amar Nath; Ananatha Jyothi
Creating and Customizing High-Impact Excel Workbooks from SAS with ODS EXCEL	Josh Horstman
From SAS to R: Five Essential Clinical Graphics Every SAS Programmer Should Know	George (Zuojun) Wu; Jessie Yan; Jamie Yan
Working in SGPLOT: Understanding the General Logic of Attributes	Jonathan Duggins; Jim Blum
TARDIS: Tracking Alterations and Record Differences in SAS, a Macro to Add Color to Your Dataset Com	Inka Leprince
Back to top
